Video & Photographics Concept II

A series of DVDs were put together as tools for individual towns in the South-Coast region of West Australia, with an informative presentation on what to see in the town and region.

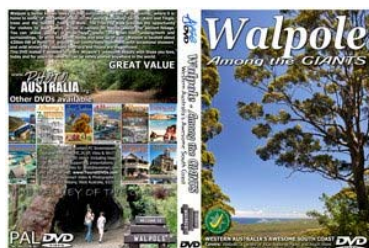

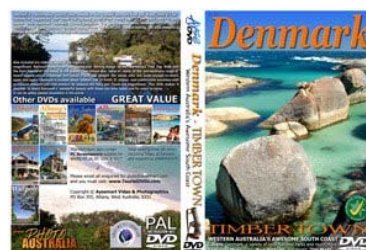

On the DVD are scenes from most of the region's National Parks and popular beaches, each play in order after the main features, when you select the "Full Tour" in the main menu.

Bonuses are added as DVD fillers, these could be removed as space is required for ongoing project updates.

There's a menu titled "Sample Supporters", these are examples of what tourism related businesses (*ie. Tours, Cruises, Attractions etc*) in your town could have on the DVD, once added, the related sample/s will be deleted.

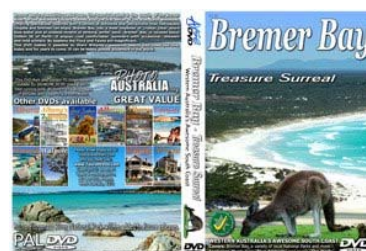

New Supporter Presentations might be placed where required throughout the main features.

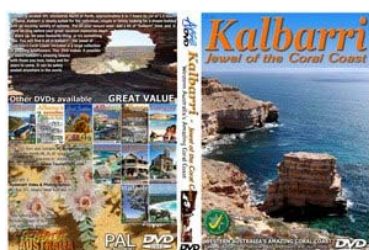

A menu titled "About Us" includes a demonstration of footage shot around Australia, explaining another concept available to regional towns around Australia.

Each supporting business is required to either be selling the DVD/s (*minimum purchase required*) or pays an affordable fee to be promoted.

Profits are good for those that retail, plus you are promoting your town as a base of which visitors and potential new residence could see the entire region, over a long period of time, promoting longer stays.

Your DVD makes a fantastic keep sake tool for you to show off the beautiful and unique area of Australia you live in.
